

## MISSION STATEMENT

The animal health industry provides value to society by protecting animals and as a consequence, humans, from diseases. Our products help keep pets and food-producing animals healthy. The public health benefits we bring include safer and more secure food supplies, more efficient production for increased food supply, improved sustainability, and prevention of the transmission of zoonotic diseases.

## INNOVATION IN ANIMAL HEALTH

### 1910s

- 1<sup>st</sup> US veterinary licence issued for production of antihog-cholera serum

### 1950s

- 1<sup>st</sup> veterinary antibiotics licensed in the US and Europe
- Development of rinderpest vaccine
- Brucellosis virtually eliminated in the US

### 2000s

- Development of west nile virus vaccine for horses
- Development of avian flu vaccine in response to human and bird flu pandemic

### 1761

- 1<sup>st</sup> veterinary school founded in Lyon, France

### 1960s

- Rabies vaccine widely available in Western world, leading to effective control of disease
- Discovery of thiabendazole, the 1<sup>st</sup> benzimidazole anthelmintic

### 2005

- 1<sup>st</sup> DNA vaccine authorised, pioneering a new technology now also used in human medicine

### 1880s

- 1<sup>st</sup> anthrax vaccine and rabies vaccine developed

### 1930s

- 1<sup>st</sup> foot and mouth disease vaccine developed
- 1<sup>st</sup> brucellosis vaccine developed

### 1970s

- Discovery of avermectins revolutionising parasite-control in veterinary and human medicine

### 1980s

- Development of new mechanisms for antiparasitics for livestock and pets as well as products for reproduction management
- Development of modern foot and mouth disease vaccine

### 2011

- Rinderpest officially eradicated—only 2<sup>nd</sup> disease eliminated by global programmes
